

Frequency of numbers drawn since inception

up to & including May 31, 2020

Winning number frequency charts are provided for players' interest and entertainment. There's no such thing as a "hot" number, or a number that's "due" to be drawn. Every number has an equal chance of being drawn at any time.

NOTE: Graphs do not include Bonus Numbers, Grand Numbers, Guaranteed Million, MAXMILLIONS or WESTERN MAX additional draw sets.

In the event of any discrepancy between these numbers and the official winning numbers lists, the latter shall prevail.
